HP 49/50 series - Wikipedia

CHIP-8 is an interpreted programming language, developed by Joseph Weisbecker.It was initially used on the COSMAC VIP and Telmac 1800 8-bit microcomputers in the mid-1970s. CHIP-8 programs are run on a CHIP-8 virtual machine.It was made to allow video games to be more easily programmed for these computers, but CHIP 8 is still used today, due to its simplicity, and consequentially on any ...

CHIP-8 - Wikipedia

The reason device and battery manufacturers recommend that old batteries should not be mixed with new ones is to prevent leakages. This is because the average consumer does not have a battery tester or multimeter to test the remaining voltages of used batteries, to know which could be kept or which to be discarded.

Thanks for writing in, watchguy_115. Brera Orologi seems to be a new brand and player in the men's and sports watch market. While they do not have the kind of heritage in watchmaking as the other more established and older brands above, they do employ good materials in some of their watches, like Grade 316 stainless steel in the divers models.

Let's start right off with a controversial claim: Forth is the hacker's programming language. Coding in Forth is a little bit like writing assembly language, interactively, for a strang...

Forth: The Hacker's Language | Hackaday

More than a year-and-a-half into the COVID-19 pandemic, burnout seems to be on everyone's lips. Many of us didn't realise what had hit us when we scrambled to adjust to the sudden upheaval of the workplace, switching to remote work with little or no preparation, or deemed an essential worker and asked to continue business-as-usual in highly unusual circumstances.
