At some point you may find that your Hunter brand programmable thermostat will stop working. Not only will it stop working, but it will fail at either the hottest or the coldest time of the year. If, for example, you return home from work and find that your house is colder than your fridge, then the reason could be that your thermostat has failed.

**How to Get a Hunter Programmable Thermostat Working Again ...**

My Hunter 44110 thermostat is flashing the number 4 and even if I set the thermostat at 68 degrees, it will go back down to 60 degrees both during the day and at night. I think it is specific to the thermostat. The heat comes on fine, the thermostat does not stay at the degree to which I set it. I am planning to work on this myself.
