Use of infant formula Infant formula should be selected based on the medical needs of the infant. Where available, use commercially sterile liquid infant formula for infants at greatest risk. Use of feeding cups For areas where sanitation and clean water are a problem, cup-feeding is a safer option than bottle-feeding.

How to Prepare Powdered Infant Formula In

We all hope we'll never be put in the position of having to save a baby's life, but it could happen. Babies can and do choke on food and toys, slip under the water in the tub or a pool, and get caught in drawstrings and curtain cords.. This step-by-step guide explains the basics of first aid for choking and CPR, but please don't rely on it as your sole source of information.

Infant first aid for choking and CPR: An illustrated guide ...

Breastfeeding is the normal and unequalled method of feeding infants. Health Canada promotes breastfeeding - exclusively for the first six months, and sustained for up to two years or longer with appropriate complementary feeding - for the nutrition, immunologic protection, growth, and development of infants and toddlers.
