World's Greatest Hobby Online, a new type of virtual model train show, was a huge success. It was the first virtual model train show to replicate the in-person train show experience. Over 10,000 people attended the show and over fifty companies and organizations participated in the show.

GreatestHobby.com

Rail transport modelling uses a variety of scales (ratio between the real world and the model) to ensure scale models look correct when placed next to each other. Model railway scales are standardized worldwide by many organizations and hobbyist groups. Some of the scales are recognized globally, while others are less widespread and, in many cases, virtually unknown outside their circle of origin.

Converting Between Scale Types. To theoretically convert ratio scales into height scales - and assuming here that height scales measure to "eye height" while ratio scales measure to "head height" - divide 1610 by the scale. For example, 1/285 figures are pretty much the same scale as 1610 / 285 = 5.65 6mm figures. The reverse is also true: to get ratio scale, divide 1610 by the height scale.
