Calculate and Check Your Estimated Band Score. Once you have your estimated band score for each module, add them together and divide by four (i.e. Reading 6.0; Listening 6.5; Writing 7.0; Speaking 7.5 = 27 ÷ 4 =6.75, which would be rounded up to a band score of 7.0) Once you have your overall estimated band score, check it against the official description of what your level of mastery should be.

As a caveat, this will only work if you run your python as a module, from outside of the package. For example: python -m Proj Original hacky way. This method is still commonly used in some situations, where you aren't actually ever 'installing' your package. For example, it's popular with Django users.
