### Procedural Errors In Endodontics Aetiology

Aetiology: A- Iatrogenic: 1- Misaligned use of burs during access preparation and search for canal orifices 2- During efforts to negotiate calcified and curved canals 3- Overzealous instrumentation towards a root concavity (Strip perforation) 4- Inappropriate post space preparation B- Pathological: 1- Caries 2- Root resorption

### Procedural errors in endodontics; aetiology, prevention ...

The clinician is often misled by the notion that procedural errors, such as broken instruments, perforations, overfilling, underfilling, ledges and so on are the direct cause of endodontic failure. In most cases, procedural errors do not jeopardize the outcome of endodontic treatment unless a concomitant infection is present. In truth, a procedural accident often impedes or makes it impossible to accomplish appropriate intracanal procedures.
